Professional Summary

Full-Stack Web Developer with a strong foundation in JavaScript, React, Next.js, and Node.js. Experienced in designing custom, performant web applications, building seamless database schemas, and delivering tailored client solutions. Brings a unique perspective from a multi-year background in technical education and program management, combining strong communication skills with a methodical approach to software architecture.

Technical Skills

- **Languages & Frameworks:** JavaScript, React, Next.js, Node.js
- **Database & Architecture:** SQL, PostgreSQL, Prisma, Redis
- **Tools & Deployment:** Vercel, Cursor, Git, Godot (GDScript)
- **Certifications:** Web Development Certification (Bloom Institute of Technology), Google AI Specialization (Coursera)

Featured Projects

Weed and Read

Next.js, SQL, Prisma, Vercel | www.weedandread.com |
github.com/CodyAskew9/Weed_and_Read

- Architected and launched a custom, zero-tracking web application for a boutique dispensary.
- Engineered a specialized text-based card catalog interface to optimize product discoverability and user experience.
- Designed the backend database schema and managed the live end-to-end deployment pipeline.
- Facilitated successful platform handover and client onboarding following project completion.

Class Crest

PostgreSQL, Redis | www.class-crest.com | github.com/CodyAskew9/classStore

- Developed a comprehensive classroom coding and management platform designed specifically to support K-5 students and educators.
- Built a gamified student interface featuring visual logins and custom avatar creation to drive daily engagement.
- Engineered a robust teacher dashboard to facilitate real-time engagement monitoring, behavior reward tracking, and automated code debugging.
- Architected a scalable backend environment, leveraging a PostgreSQL database for relational data and Redis for real-time state management.

Professional Experience

Freelance Full-Stack Developer

Albuquerque, NM | May, 2026 – Present

- Design and develop independent software solutions and full-stack applications for diverse client needs.
- Architected *RedshiftHR*, a comprehensive disciplinary action and incident tracking software platform, handling complex data structures and state management.

Technology & Coding Instructor (Cod-IE)

Altura Preparatory School, Albuquerque, NM | January, 2023 – May 2026

- Managed and operated an after-school technology and computer coding program for K-5 students over a successful three-year tenure.
- Developed and delivered independent lesson plans focused on foundational programming logic and comprehensive online safety.
- Communicated complex technical concepts into an accessible, age-appropriate curriculum.
